Terrestrial Management Workshop: Invasive Trees & Shrubs

Thursday, June 12, 2025
10:00 AM - 12:00 PM
Iroquois National Wildlife Refuge

PARTNERSHIP FOR REGIONAL INVASIVE SPECIES MANAGEMENT
WESTERN NEW YORK

Join WNY PRISM for a workshop on how to manage some of our most common invasive tree and shrub species!

Learn how to manage some common invasive species that may be present on your property. We'll talk about Best Management Practices for invasive trees and shrubs including tree of heaven, buckthorn and honeysuckle. We'll review manual, mechanical and chemical methods with a focus on specific treatment techniques including foliar treatment, cut stump and basal bark. We'll have an opportunity to see equipment used for management during the outdoor portion. We will also discuss management planning and prioritization, and we'll review some native tree and shrub alternatives to plant after invasive species removal.

This workshop will offer the following NYS pesticide credits: 2 credits in categories 2 and 3a and 1.5 credits in category 6a. To receive credits, you must register at least 24 hours before the workshop, show up at least 15 minutes early (by 9:45 AM) to sign in, bring your applicators license and attend the entire workshop.

Please register at: https://bit.ly/TerrestrialWorkshop2025.
