Help Protect Our Hemlocks!

WNY PRISM Hemlock Woolly Adelgid Hunters Training

Saturday, January 17, 2026 | 10 AM - Noon

Trillium Nature Center at Beaver Meadow Nature Preserve

The eastern hemlock is a foundation species in our forests, but it's threatened by the invasive hemlock woolly adelgid (HWA), a tiny insect with a big impact. Early detection is a great way to help slow the spread of HWA and **you can help**.

Become an HWA Hunter with WNY PRISM!

Join this training to learn how to identify, survey for and report HWA, and adopt a location to survey this winter. No experience needed!

Protect our forests by volunteering this winter!

Register at <https://bit.ly/2026HWATraining> or via the QR code below.

Deadline: Thursday, January 15, 2026.
